<p>* Individual Product Component Note Standard Quality Control Tests are performed for each component included in EpiMark® 5-hmC and 5-mC Analysis Kit and meet the designated specifications.</p>	Pass
<p>Functional Testing (EpiMark® 5-hmC and 5-mC Analysis Kit) Unmodified Control DNA was treated with T4-BGT and UDP-Glucose to convert 5-hmC to 5-ghmC and digested with either MspI or HpaII as described in the manual. HpaII cleavage is blocked by 5-mC, 5-hmC and 5-ghmC resulting in a PCR product that confirms the presence of both 5-mC and 5-hmC. MspI cleavage is blocked only by 5-ghmC resulting in PCR product that confirms the presence of 5-hmC.</p>	Pass

This product has been tested and shown to be in compliance with all specifications.
