<b>Physical Purity (HPLC)</b> Each Acyclonucleotide is $\geq 95\%$ pure as determined by HPLC analysis.	<b>Pass</b>
<b>Functional Testing (Acyclonucleotides)</b> A modification of Sanger sequencing is employed in which Terminator DNA Polymerase is mixed with primer, template, dNTPs, and one acyNTP. Resulting peaks are analyzed for intensity and distribution by electrophoresis and compared to those produced by prior acyNTP lots. The intensity and distribution of peaks are similar to previously accepted lots.	<b>Pass</b>
