N0469S

125-250 gel lanes (1.25 ml) Lot: 0171204
100 µg/ml Store at 4°C Exp: 4/14

Description: Quick-Load® 2-Log DNA Ladder is a pre-mixed, ready-to-load molecular weight marker containing bromophenol blue as a tracking dye.

The DNA Ladder consists of proprietary plasmids which are digested to completion with appropriate restriction enzymes to yield 19 bands suitable for use as molecular weight standards for agarose gel electrophoresis. This digested DNA includes fragments ranging from 100 bp to 10 kb. The 0.5,

Ready-to-load, Stable at 25°C

1.0 and 3.0 kb bands have increased intensity to serve as reference bands.

Supplied in: 2.5% Ficoll-400, 11 mM EDTA, 3.3 mM Tris-HCl (pH 8.0 @ 25°C), 0.017% SDS and 0.015% bromophenol blue.

Usage Recommendation: We recommend loading 5–10 µl (0.5–1.0 µg) of Quick-Load 2-Log DNA Ladder per gel lane. The Quick-Load 2-Log DNA Ladder is not intended for precise quantification of DNA mass but can be used for approximating the mass of DNA in comparably intense samples of similar size. The approximate mass of DNA in each of the bands in our Quick-Load 2-Log DNA Ladder is indicated assuming a 10 µl (1.0 µg) load.

CERTIFICATE OF ANALYSIS

Preparation of DNA: The double-stranded DNA is digested to completion with appropriate restriction enzymes, phenol extracted and equilibrated in storage buffer.

Notes:

Quick-Load 2-Log DNA Ladder is stable for at least 6 months at 25°C.

For long term storage, store at 4°C or –20°C. If stored at –20°C, mix well after thawing.
