**New England Biolabs**

**Product Specification**

**Product Name:** SARS-CoV-2 Rapid Colorimetric LAMP Assay Kit  
**Catalog #:** E2019S  
**Kit Components:**  
- *WarmStart® Colorimetric LAMP 2X Master Mix with UDG (M1804)*
- *SARS-CoV-2 Positive Control (N gene) DNA (N2117)*
- *Internal Control LAMP Primer Mix (rActin) (S0164)*
- *SARS-CoV-2 LAMP Primer Mix (N/E) (S1883)*
- *Nuclease-free Water (B1502)*
- *Guanidine Hydrochloride Solution (B2619)*

**Shelf Life:** 12 months  
**Storage Temp:** -20°C  
**Specification Version:** PS-E2019S v2.0  
**Effective Date:** 06 Jan 2021

### Assay Name/Specification (minimum release criteria)

**Functional Testing (RT-LAMP, SARS-CoV-2)** - SARS-CoV-2 Rapid Colorimetric LAMP Assay Kit is functionally tested and compared to a previous kit lot using human total RNA and human total RNA spiked with synthetic SARS-CoV-2 RNA in a 30-minute colorimetric LAMP assay at 65°C. Prior to isothermal incubation, all assembled reactions must be pink. Following incubation, internal control reactions containing human total RNA with and without SARS-CoV-2 RNA and SARS-CoV-2 Positive Control reactions must result in a color change indicating positive detection while reactions that lack template remain pink. SARS-CoV-2 reactions containing human total RNA spiked with SARS-CoV-2 RNA must result in a color change indicating positive detection observable down to 50 copies while reactions that lack template remain pink.

* **Individual Product Component Note** - Standard Quality Control Tests are performed for each component included in SARS-CoV-2 Rapid Colorimetric LAMP Assay Kit and meet the designated specifications.
