## New England Biolabs Certificate of Analysis

Product Name: LunaScript® RT Master Mix (Primer-free) Kit

Catalog Number: E3025L
Packaging Lot Number: 10137283
Expiration Date: 03/2023
Storage Temperature: -20°C

Specification Version: PS-E3025S/L v1.0

| LunaScript® RT Master Mix (Primer-free) Kit Component List |                                         |            |                      |  |
|------------------------------------------------------------|-----------------------------------------|------------|----------------------|--|
| <b>NEB Part Number</b>                                     | Component Description                   | Lot Number | Individual QC Result |  |
| M3026LVIAL                                                 | No-RT Control Mix (Primer-free)         | 10105220   | Pass                 |  |
| M3025LVIAL                                                 | LunaScript® RT Master Mix (Primer-free) | 10105219   | Pass                 |  |
| B1502AVIAL                                                 | Nuclease-free Water                     | 10128741   | Pass                 |  |

| Assay Name/Specification                                                                                | Lot # 10137283 |
|---------------------------------------------------------------------------------------------------------|----------------|
| * Individual Product Component Note                                                                     | Pass           |
| Standard Quality Control Tests are performed for each component included in                             |                |
| LunaScript® RT Master Mix Kit (Primer-free) and meet the designated specifications.                     |                |
| Functional Testing (RT-PCR, Length)                                                                     | Pass           |
| The performance of LunaScript® RT Master Mix Kit (Primer-free) is tested in a 20 µl                     |                |
| RT reaction with 1 µg human total RNA. The length of the product is verified by                         |                |
| amplification using 1 μl of the RT reaction and 36 cycles of PCR amplification                          |                |
| resulting in the expected 9.3 kb product. The target is not amplified from the no-RT control reactions. |                |
|                                                                                                         |                |
| Functional Testing (Two-Step RT-qPCR)                                                                   | Pass           |
| The LunaScript® RT Master Mix Kit (Primer-free) is functionally tested in two-step                      |                |
| RT-qPCR with human RNA template and Random Primer Mix, resulting in a standard curve                    |                |
| with a calculated qPCR efficiency of 90-110%, and a dynamic range of 7 orders of                        |                |
| magnitude.                                                                                              |                |

This product has been tested and shown to be in compliance with all specifications.
