## New England Biolabs Certificate of Analysis

| Product Name:          | LunaScript® RT Master Mix (Primer-free) Kit |
|------------------------|---|
| Catalog Number:        | E3025L                                      |
| Packaging Lot Number:  | 10219577                                    |
| Expiration Date:       | 11/2025                                     |
| Storage Temperature:   | -20°C                                       |
| Specification Version: | PS-E3025S/L v1.0                            |

| LunaScript® RT Master Mix (Primer-free) Kit Component List |   |            |                      |
|--|---|------------|----------------------|
| NEB Part Number  | Component Description                   | Lot Number | Individual QC Result |
| M3026LVIAL   | No-RT Control Mix (Primer-free)         | 10215069   | Pass                 |
| M3025LVIAL   | LunaScript® RT Master Mix (Primer-free) | 10215068   | Pass                 |
| B1502AVIAL   | Nuclease-free Water                     | 10201556   | Pass                 |

| Assay Name/Specification  | Lot # 10219577 |
|---|----------------|
| * Individual Product Component Note   | Pass           |
| Standard Quality Control Tests are performed for each component included in                             |                |
| LunaScript® RT Master Mix Kit (Primer-free) and meet the designated specifications.                     |                |
| Functional Testing (RT-PCR, Length)   | Pass           |
| The performance of LunaScript® RT Master Mix Kit (Primer-free) is tested in a 20 µl                     |                |
| RT reaction with 1 $\mu$ g human total RNA. The length of the product is verified by                    |                |
| amplification using 1 $\mu$ I of the RT reaction and 36 cycles of PCR amplification                     |                |
| resulting in the expected 9.3 kb product. The target is not amplified from the no-RT control reactions. |                |
| Functional Testing (Two-Step RT-qPCR)   | Pass           |
| The LunaScript® RT Master Mix Kit (Primer-free) is functionally tested in two-step                      |                |
| RT-qPCR with human RNA template and Random Primer Mix, resulting in a standard curve                    |                |
| with a calculated qPCR efficiency of 90-110%, and a dynamic range of 7 orders of                        |                |
| magnitude.  |                |

This product has been tested and shown to be in compliance with all specifications.
