## New England Biolabs Certificate of Analysis

Product Name: Amylose Resin High Flow

Catalog Number: E8022S
Packaging Lot Number: 10203697
Expiration Date: 09/2024
Storage Temperature: 4°C

Specification Version: PS-E8022S/L v2.0

Amylose Resin High Flow Component List			
<b>NEB Part Number</b>	Component Description	Lot Number	Individual QC Result
E8022SVIAL	Amylose Resin High Flow	10114739	Pass

Assay Name/Specification	Lot # 10203697	
Functional Binding Assay (Resin Binding Capacity)	Pass	
Amylose Resin High Flow (1 ml) was packed into a column and equilibrated with		
column buffer. Crude extract from E. coli containing a plasmid that expresses a		
MBP5*-paramyosin∆Sal fusion protein ( 8 ml ) was then passed through the column at		
25°C, then washed with column buffer and the target protein eluted with ≥4 ml of		
column buffer containing 10 mM maltose. Binding capacity was determined to be >4 mg		
MBP5*-paramyosinΔSal /ml of resin based on A280 of the eluate.		
Functional Binding Assay (Resin Binding Specificity)	Pass	
Amylose Resin High Flow (1 ml) was packed into a column and equilibrated with		
column buffer. Crude extract from E. coli containing a plasmid that expresses a		
MBP5*-paramyosin∆Sal fusion protein ( 8 ml ) was then passed through the column at		
25°C, and then washed with column buffer. The target protein was eluted with ≥4 ml		
of column buffer containing 10 mM maltose. SDS-PAGE of the eluate on a 10-20%		
Tris-Glycine gel confirms low non-specific binding of extract proteins and high		
isolation of target.		

This product has been tested and shown to be in compliance with all specifications.
