## New England Biolabs Certificate of Analysis

| Product Name:          | PURExpress® In Vitro Protein Synthesis Kit |
|------------------------|--|
| Catalog Number:        | E6800S                                     |
| Lot Number:            | 10029441                                   |
| Expiration Date:       | 11/2020                                    |
| Storage Temperature:   | -80°C                                      |
| Specification Version: | PS-E6800S/L v1.0                           |

| PURExpress® In Vitro Protein Synthesis Kit Component List |                                    |            |                      |  |
|---|------------------------------------|------------|----------------------|--|
| NEB Part Number   | Component Description              | Lot Number | Individual QC Result |  |
| P0760AVIAL  | PURExpress <sup>®</sup> Solution B | 10028182   | Pass                 |  |
| N0424AVIAL  | Control (DHFR) template            | 10014681   | Pass                 |  |
| B0228AVIAL  | PURExpress Solution A              | 10028180   | Pass                 |  |

| Assay Name/Specification  | Lot # 10029441 |
|---|----------------|
| <b>Functional Testing (Cell Free Protein Synthesis Assay) (DHFR)</b><br>A 25 µl reaction in the presence of 250 ng E. coli DHFR template DNA and 20 units<br>RNase Inhibitor containing the components of the PURExpress® In Vitro Protein<br>Synthesis Kit incubated for 2 hours at 37°C results in the expected 20 kDa product<br>as determined by SDS-PAGE with Coomassie Blue detection.                      | Pass           |
| <b>Functional Testing (Cell Free Protein Synthesis Assay) (Vent DNA Polymerase</b><br>A 25 µl reaction in the presence of 250 ng Vent DNA Polymerase template DNA and 20<br>units RNase Inhibitor containing the components of the PURExpress® In Vitro Protein<br>Synthesis Kit incubated for 2 hours at 37°C results in the expected 89 kDa product<br>as determined by SDS-PAGE with Coomassie Blue detection. | Pass           |
| <b>Functional Testing (Cell Free Protein Synthesis Assay) (galactosidase)</b><br>A 25 μl reaction in the presence of 250 ng β-galactosidase template DNA and 20 units<br>RNase Inhibitor containing the components of the PURExpress® In Vitro Protein<br>Synthesis Kit incubated for 2 hours at 37°C results in the expected 116 kDa product<br>as determined by SDS-PAGE with Coomassie Blue detection.         | Pass           |
| * Individual Product Component Note<br>Standard Quality Control Tests are performed for each component included in<br>PURExpress® In Vitro Protein Synthesis Kit and meet the designated specifications.  | Pass           |

This product has been tested and shown to be in compliance with all specifications.
