

New England Biolabs Certificate of Analysis

Product Name: Amylose Resin
Catalog #: E8021S/L
Lot #: 0231804
Assay Date: 04/2018
Expiration Date: 4/2021
Storage Temp: 4°C
Specification Version: PS-E8021S/L v1.0
Effective Date: 02 May 2018

Assay Name/Specification (minimum release criteria)	Lot #0231804
<p>Functional Binding Assay (Resin Binding Capacity) - Amylose Resin (1 ml) was packed into a column and equilibrated with column buffer. Crude extract from <i>E. coli</i> containing a plasmid that expresses a MBP5*-paramyosinΔSal fusion protein (8 ml) was then passed through the column at 25°C, then washed with column buffer and the target protein eluted with 4 ml of column buffer containing 10 mM maltose. Binding capacity was determined to be >4 mg MBP5*-paramyosinΔSal /ml of resin based on A280 of the eluate.</p>	Pass
<p>Functional Binding Assay (Resin Binding Specificity) - Amylose Resin (1 ml) was packed into a column and equilibrated with column buffer. Crude extract from <i>E. coli</i> containing a plasmid that expresses a MBP5*-paramyosinΔSal fusion protein (8 ml) was then passed through the column at 25°C, and then washed with column buffer. The target protein was eluted with 4 ml of column buffer containing 10 mM maltose. SDS-PAGE of the eluate on a 10-20% Tris-Glycine gel confirms low non-specific binding of extract proteins and high isolation of target.</p>	Pass
